Problem

Traditional foot pumps cannot bead tyres

Garage compressors safety risk!

Problem

Standard pumps require power from the car battery

Difficult to reach trailer / caravan. Cable trip hazard!

Problem

Loose fitting connection leads to air leakage

Difficult to fill a boost bottle to 11 bar by floor pump

Solution

AB = air blast
CYLINDER KIT

Removes the uncertainty of beading and inflating a tubeless-ready MTB tyre without the safety hazards associated with using a shop-floor compressor. Fills to **8.3 bar (120psi)** with any compressor/ floor pump. Can bead bicycle tyres when wheel bought to it or can top up bicycle tyres by opening velcro strap and taking charged cylinder to the bicycle.

Convenient wheel hooks. Air Chuck locks to valve.

Recharge with floor pump to charge AB cylinder to 8.3 bar.

OT = on tap
COMPRESSOR KIT

Automotive quality, very powerful portable cordless mini-compressor. For all camping, 4x4, around the home inflation applications. Manual filling of any tyre/pressure canister to **10 Bar (145psi)**. Best in-class battery life. USB port for charging devices and removable USB LED torch.

Pressure bleed-off valve for setting tyre pressure exactly

Detachable USB torch and 12v -14v USB Power Pack

ABOT = air blast on tap
FULL KIT

The Cylinder and Compressor combo (with pressure switch) for beading bicycle tyres AND OT = on tap for pumping up vehicle tyres AND various DIY tasks. Auto filling of cylinder to **8.3 bar (120psi)**.

Mounts to any flat surface.

Charge internal battery via vehicle or wall outlet.
